**Separation of the emulsion from Battonya K-83
before treatment**

1. Prior to petrol-biochemical treatment, 2. After first treatment,
3. After second treatment, 4. After third treatment

Fig. 6

**Fig. 7a. Separation of the emulsion from Ruzsa-28
in resting conditions**

1A. Control untreated emulsion
3A. Treated with microorganisms

2A. Treated with industrial surfactant
4A. Treated with petrol-biochemical suspension

**Fig. 7b. Separation of the emulsion from Ruzsa-28
one minute after mixing**

1B. Control untreated emulsion 2B. Treated with industrial surfactant
3B. Treated with microorganisms 4B. Treated with petrol-biochemical suspension
